FOUNDER × 2

CTO × 1

3 PRODUCTS BUILT

I turn useful ideas into products people can actually use.

Product builder with end-to-end experience across product strategy, UI/UX design, full stack engineering, deployment, and iteration. JabuStudy has reached more than 1,500 users, while Indegenius has grown to more than 300 active users. My third product, JabuMarket, is currently being prepared for launch.

01 EXPERIENCE

Founder and Product Builder

2023 TO PRESENT

Gratitude Builds · Remote

- Own the complete product journey from opportunity discovery and strategy to interface design, engineering, launch, and iteration.
- Built three products across education, campus commerce, and intellectual publishing, working across product decisions, frontend, backend, data, and deployment.
- Turn user needs and business goals into clear product direction, usable interfaces, and dependable production systems.

CTO and Product Builder

PRESENT

Indegenius · Remote

- Lead technical direction and translate the product vision into an intellectual social platform with more than 300 active users.
- Own product architecture, UI/UX, full stack implementation, system behaviour, shipping, and technical decisions required for growth.
- Designed focused experiences for publishing, reading, research, debates, discovery, and thoughtful participation.

02 SELECTED PRODUCTS

JabuStudy

1,500+ USERS

Founder and End-to-end Product Builder

Built a study and CBT preparation platform that brings materials, practice, academic progress, and AI-assisted explanations into one focused experience.

jabustudy.com

Indegenius

300+ ACTIVE USERS

CTO and Product Builder

Built and lead the technology behind an intellectual social platform for student ideas, publishing, discovery, research, and debate.

indegenuis.africa

JabuMarket

PRE-LAUNCH

Founder and End-to-end Product Builder

Designed and developed a campus marketplace connecting product listings, food vendors, services, delivery, real-time messaging, and multi-role access.

jabumarket.com

03 CAPABILITIES

Product

Product strategy, opportunity discovery, information architecture, user flows, prioritisation, iteration

Design

UI/UX design, interaction design, prototyping, responsive design, design systems

Engineering

Next.js, React, TypeScript, JavaScript, Node.js, Supabase, PostgreSQL, REST APIs, Tailwind CSS

Delivery

Git, GitHub, Vercel, authentication, real-time systems, database design, deployment

04 EDUCATION

B.Sc. Nursing Science

Joseph Ayo Babalola University

IN PROGRESS

Software development and product design learned through self-directed study and hands-on product building.

05 WHAT I BRING

- End-to-end product ownership
- Design and engineering in one workflow
- Technical leadership and founder judgement
- Experience shipping for real users
- Calm, precise, self-directed execution
